

ALAIN JULIEN

Business Analyst | Data Analyst

Trinidad & Tobago | (868) 737-5419 | alain_j@live.com | linkedin.com/in/alain-julien | alainsportfolio.netlify.app

PROFESSIONAL SUMMARY

Business Analyst and Data Analyst with 3+ years of experience owning requirements, scope, and validation for enterprise digital platforms across public sector and international consulting environments. Skilled in translating business needs into technical specifications, leading SIT/UAT cycles, and partnering with data and engineering teams to ensure reporting outputs align with operational and leadership priorities. Combines BA fundamentals, process mapping, requirements documentation, stakeholder management, with hands-on SQL, Python, and Power BI for data validation and insight delivery. Delivers against national-scale and multi-country programs.

TECHNICAL SKILLS

Business Analysis: Requirements gathering & ownership, process mapping, gap analysis, business process re-engineering, SIT/UAT coordination, test script development, documentation, stakeholder management

Data Analysis & Querying: SQL, Python (Pandas, GeoPandas), Excel (Pivot Tables, Power Pivot, VBA), data validation, hypothesis-driven analysis, KPI definition

Reporting & Visualization: Power BI, DAX, Power Query (M), Tableau, executive reporting, dashboard specification

Enterprise Tools: Oracle Fusion HCM, AWS (S3, Athena, Glue), dbt / Snowflake (foundational), AI-assisted analysis (Claude)

EXPERIENCE

Business Systems Analyst

March 2023 - August 2025

Ministry of Public Administration, Government of Trinidad & Tobago

- Led internal SIT and UAT for Oracle Fusion HCM Phase 1, directing a team of 10 testers and coordinating with multiple financial institutions; authored 700+ test scripts and executed 40+, validating cross-module data accuracy, reporting outputs, and end-to-end business scenarios.
- Owned end-to-end technical and functional requirements for a customer experience (CX) platform serving the Government of Trinidad & Tobago, translating stakeholder needs into detailed specifications for delivery teams.
- Led data analysis and reporting initiatives across integrated government systems, identifying data sources, pulling and validating data, and ensuring reporting outputs aligned with analytical assumptions and business priorities.
- Supported national enterprise digital platforms spanning 39 ministries and agencies (10 in phased trial implementation), ensuring system requirements, data flows, and reporting outputs aligned with operational and leadership needs.

ICT & Business Consultant

June 2019 - March 2022

Avasant Consulting Ltd

- Gathered and documented stakeholder requirements for ICT transformation programs; developed process flows and analytical frameworks supporting USD \$200K+ in proposals, and quality-controlled an internal proposal development tool that accelerated turnaround time by up to 20%.
- Designed and built an internal RFP analysis tool with criteria breakdown and go/no-go grading for the Foundation arm of the firm, reducing RFP analysis time by 70%.
- Analyzed platform usage and adoption data for multi-country digital programs; synthesized findings into executive reports supporting C-suite decision-making.

Early Career - IT Systems Analyst

June 2018 - June 2019

iGovTT (National ICT Authority)

Tier-1 enterprise systems support, national connectivity infrastructure (GovNeTT), system change-impact analysis, and technical documentation.

PROJECT

Seattle Illegal Dumping Analytics - Python, SQL, Power BI, DAX, Tableau, GeoPandas, AWS

- Analyzed 266,000+ service records (2021-2025) for the City of Seattle to identify resource allocation patterns; built end-to-end pipeline from raw data through executive dashboard.
- Applied hypothesis-driven analysis to challenge the initial framing: data revealed an 18% citywide decline in dumping incidents rather than the expected crisis trend, reframing the narrative from crisis response to success documentation.
- Resolved 99.9% of missing geographic data via spatial joins across 30+ ZIP codes; built a dimensional data model and delivered a 4-page executive Power BI dashboard with prioritized recommendations.

EDUCATION & CERTIFICATIONS

B.Sc. Information Technology (Special) - University of the West Indies, St. Augustine

Certifications: Microsoft Business Analyst • SQL for Data Science • Tableau Data Visualization • Google Data Analytics • AWS Generative AI Applications
