PROFESSIONAL SUMMARY

Business Intelligence & Systems Analyst with 4+ years of experience supporting public-sector digital transformation, cloud-based systems, and data-driven decision-making. Experienced in KPI framework design, analytics-ready data modeling, and translating system performance and cost data into executive-level insights across government environments.

TECHNICAL SKILLS

SQL, Power BI, AWS (S3, Athena, Glue), Data Modeling (Star Schema), Oracle Fusion HCM, KPI Design, Data Validation, UAT/SIT, Excel, Tableau

EXPERIENCE

Business Systems Analyst – Ministry of Public Administration, Government of Trinidad & Tobago

Mar 2023 – Aug 2025

- Led requirements analysis and system validation for national digital-government initiatives supporting **39 ministries and agencies**.
 - Designed performance and reliability KPI frameworks to support executive oversight during cloud and platform modernization.
 - Coordinated SIT/UAT for Oracle Fusion eHCM Phase 1, supporting **135+ testers** and validating cross-module data accuracy.
 - Conducted gap analysis and workflow optimization with BPR teams to improve service delivery and operational alignment.
 - Supported analytics standards and metadata design during Alfresco DMS rollout across **10 MDAs**.
-

ICT & Business Consultant – Avasant Consulting Ltd

Jun 2019 – Mar 2022

- Supported multi-country ICT transformation programs, delivering analytics-backed assessments for government modernization.
 - Analyzed platform usage and learning outcomes for regional digital-skills programs achieving **95% pass rates**.
 - Performed data analysis and vendor evaluations supporting **\$200K+ USD proposals**.
-

Early Career Experience – iGovTT (National ICT Authority)

Tier-1 infrastructure support, national connectivity initiatives (GovNeTT), system change-impact support.

PROJECT EXPERIENCE

Public-Sector Cloud Analytics & Digital Service Performance Portfolio – AWS, SQL, Power BI

- Built a multi-ministry analytics environment to evaluate post-migration service reliability, performance trends, and cost efficiency.
- Designed star-schema data models and curated datasets enabling KPI reporting across agencies.
- Developed dashboards tracking uptime, response times, cost anomalies, and tagging compliance for executive review.
